

Float Fresh Sanitation Schedule

	Float Fresh	Chlorine Oxidizer	Salt	Pod Lid	Water
Monday	3/4 Cup		1/2 Cup per Floater	Closed	As Needed
Tuesday	3/4 Cup		1/2 Cup per Floater	Closed	As Needed
Wednesday	3/4 Cup		1/2 Cup per Floater	Closed	As Needed
Thursday	3/4 Cup		1/2 Cup per Floater	Closed	As Needed
Friday	3/4 Cup		1/2 Cup per Floater	Closed	As Needed
Saturday	3/4 Cup		1/2 Cup per Floater	Closed	As Needed
Sunday		2 Tbsp	1/2 Cup per Floater	Open	As Needed

For proper salt density always use your hydrometer to measure the specific gravity. (1.26 - 1.30)

Remember to test for pH and Alkalinity regularly.

* This sanitation guide is for manual dosing only.

Ideal Float Fresh Levels should be between 50-80 PPM.

Mild skin irritation has been reported with levels over 100 PPM

If encountering water clarity issues feel free to use Enzymes to aid in removal of fine dissolved solids if filter rinsing does not work.
